

SUB-SAHARAN AFRICA

IFC Financing to Micro, Small and Medium Enterprises

Lack of access to financial services is one of the key barriers to the growth of micro, small and medium enterprises (MSMEs), which account for about 90 percent of the businesses and more than 50 percent of employment worldwide.¹ IFC through its network of financial institutions (FI) -- including microfinance institutions, commercial banks, leasing companies -- in more than 100 developing countries, is able to reach many more MSMEs than it could directly.

IFC offers a wide range of financial products and services to its client FIs, including loans, equity, risk sharing facilities, trade finance, working capital loans and advisory services. It also helps to mobilize funding from other FIs and investors. In fiscal year 2016, IFC in Sub-Saharan Africa (SSA) provided \$250 million of long-term finance to client FIs for MSME support. As of June 2016 in SSA, IFC's committed long-term MSME-focused portfolio was \$1.7 billion (see Chart 1). In addition, SSA had 33 active MSME-related advisory projects valued at \$34 million.

Chart 1. FY16 IFC MSME Committed Long-Term Finance Portfolio (USD \$ millions)

SSA: ANALYSIS OF MSME REACH FROM IFC FINANCIAL INSTITUTION CLIENTS

Every year IFC requests FI clients to provide IFC with information about their loan portfolio, deposits and other business related data. Through this Reach Survey IFC tracks and analyzes financing outreach to the final recipients, including MSMEs.

IFC collected and extrapolated 2015² data from 72³ clients in 24 countries in SSA, which had over 5.1 million loans outstanding worth over \$48 billion. This included retail, micro, SME and corporate loans. Of these, 62 clients globally received financing for MSME-related activities. Using IFC's proxy SME loan definition,⁴ it is estimated that these clients had 2.7 million micro and 123.3 thousand SME loans totaling \$8.7 billion.⁵ Table 1 and Chart 2 show regional distribution of micro and small loans by volume and number for all regions.

1. Source: IFC Annual Report (2015).

2. Reach Survey data is based on the calendar year cycle, which ends on December 31st, with the exception of a few clients that provide data based on different fiscal calendar.

3. Out of 72 in SSA, 7 clients have loan portfolio extrapolated. Out of 62 MSME FI clients, 6 were extrapolated.

4. IFC categorizes its clients' sub-borrowers according to the following definitions: (1) micro enterprise have loan < \$10,000 at origination; (2) small enterprise have loan \$10,000 - \$100,000 at origination; (3) medium enterprise have loan \$100,000 - \$1 million at origination (\$2 million for more advanced emerging markets).

5. While numerous controls were performed on the data provided by clients, they are sometimes based on estimates and the understanding of the indicator definitions may vary among clients.

Table 1: IFC FI Clients' Micro and SME Outstanding Loan Portfolio by Region, 2015

Region	Micro Loans		SME Loans		MSME Loans	
	# Millions	\$ Billions	# Millions	\$ Billions	# Millions	\$ Billions
East Asia and the Pacific	9.8	30.2	4.0	154.7	13.9	184.8
Europe and Central Asia	4.2	7.3	1.4	56.0	5.5	63.4
Latin America and the Caribbean	13.1	9.4	1.1	77.3	14.3	86.7
Middle East and North Africa	2.5	2.6	0.1	13.5	2.7	16.1
South Asia	18.8	8.6	0.8	34.9	19.6	43.5
Sub-Saharan Africa	2.7	1.5	0.1	7.2	2.8	8.7
Total Loans	51.2	59.5	7.6	343.7	58.8	403.2

Chart 2: IFC FI Clients' Micro and SME Outstanding Loan Portfolio Distribution (%), 2015

SSA: IFC CLIENTS' MSME LOAN PORTFOLIO BY TYPE OF IFC ENGAGEMENT

IFC places its MSME clients in two categories: FIs supported by IFC in the area of microfinance – clients with microfinance-focused engagements; and FIs supported by IFC in the area of SME financing – clients with SME-focused engagements. In 2015, IFC collected or extrapolated data from 26 microfinance and 36 SME-focused engagements in SSA. SME-focused clients funded about 15 percent of the total number of micro loans representing 33 percent of the total funding for the microenterprises. The microfinance focused clients also crossed over to SME with 22 percent of the number of SME loans and 8 percent of the total volume. In addition, 46 percent of clients with microfinance-focused engagement and 47 percent with SME-focused ones received advisory services.

Table 2: Microfinance-Focused Engagements in SSA⁶

Loan Type	Outstanding Loan Portfolio		Average Loan Size	NPLs
	# Millions	\$ Billions	\$	%
Micro	2.3	1.0	564	1.5%
SME	0.0	0.5	19,631	1.9%
Total	2.3	1.6	927	1.7%

Table 3: SME-Focused Engagements in SSA⁷

Loan Type	Outstanding Loan Portfolio		Average Loan Size	NPLs
	# Millions	\$ Billions	\$	%
Micro	0.4	0.5	1,356	8.8%
SME	0.1	6.6	82,062	6.0%
Total	0.5	7.1	14,502	6.2%

Notably, the portfolios of micro and SME-focused engagements were different in terms of loan performance. The clients receiving microfinance focused financing and services reported very low non-performing loan (NPL) levels – about 1.7 percent. The NPL level was at 6-9 percent among clients with SME-focused engagements.

SSA: IFC CLIENTS' LOANS TO WOMEN AND WOMEN-OWNED SMES

Gender equality is a fundamental condition for a prosperous and sustainable world; however, in many countries women have lower access to education, employment, business opportunities and financial services, as well as unequal social status and rights. The annual estimated credit gap for women-owned SMEs is about \$260-320 billion.⁸

To address this challenge, IFC launched Banking on Women Program that promotes financing for women-owned SMEs. In addition, recently IFC requested clients to report on their loan portfolios to women-owned enterprises. In 2015, 36 IFC FI clients provided gender-disaggregated data in SSA. These clients provided about 74 percent of micro loans by number to women, and 16 percent of total SME loans by number to women-owned firms⁹ (see Table 4). Non-performing loans of the women borrowers were lower comparing to overall loan NPLs (see Tables 4, 2 and 3).

Table 4: SSA: IFC FI Clients' Loans to Women and Women-owned SMEs

Loan Type	Number of Loans to Women	Total Volume of Loans to Women	Number of Loans to Women	Total Volume of Loans to Women	NPLs
	# '000	\$ Millions	% Of total	% Of total	%
Micro	1,080.2	489.74	73.9%	51.1%	1.1%
SME	8.9	185.88	16.0%	7.4%	4.0%

SSA: MSME LOAN PORTFOLIO GROWTH AND DYNAMICS

The volume of micro and SME loans by IFC's portfolio of MSME client FIs has grown consistently over time. Three main factors influence MSME loan portfolio growth: 1) changes in the MSME portfolio among existing IFC clients, 2) entries of new clients, and 3) exits of existing clients, when, for example, IFC clients fully repay their loans. The dynamics of these factors determines the MSME reach growth trends from year to year. Thus, in the post-financial crisis period (2011-2015), the MSME loan portfolio increased 58 percent by number, and 14 percent by volume on a compounded basis.

During 2014-2015, the number of MSME loans increased by 17 percent, although the volume of loans decreased by 6 percent. In 2015, new clients contributed with 356 thousand MSME loans totaling \$2.2 billion. Also, 36 MSME-focused clients reported data in 2013, 2014, and 2015. During this period, the number of MSME loans they provided grew by 9 percent on a compounded basis.

6,7. Average Loan Size and NPLs do not include extrapolated data.

8. IFC Enterprise Gap Database (2011). <http://smefinanceforum.org/data-sites/ifc-enterprise-finance-gap>

9. IFC defines women-owned SME as a firm with (a) > 51 percent ownership/stake by a woman/women; or (b) > 20 percent owned by a woman/women AND 1 woman as CEO/COO (President/Vice-President) as well as 30 percent of the board of directors being women where a board exists; and which received loans from \$10,000 to \$1 or 2 million at origination.

Chart 3. SA: IFC Clients' MSME Loan Portfolio Growth, 2004-2015

SSA: DEPOSIT AND OTHER TRANSACTIONAL ACCOUNTS

Universal financial access is one of the strategic development goals for the World Bank Group. Financial access may include loans, but can also simply mean someone has access to alternative financial channels (i.e. mobile banking, internet banking) or deposit/saving accounts. The growth of savings accounts is also important as deposits provide major funding source for deposit taking institutions and a safe place to store cash for their clients.

In 2015, 44 clients reported \$56.5 billion in liability accounts, which include current/transactional accounts, interest-bearing deposits, and e-money accounts. In 2014, 48 institutions reported \$58.8 billion in liability accounts. Micro enterprise accounts hold about 41 percent of the total deposits volume among micro focused engagements.

Chart 4 demonstrates the distribution of the deposits and other transactional accounts by the type of the account owner.

Chart 4. SSA: IFC Clients' Volume of Deposits and Other Transactional Accounts, 2015 (Average Volume Percentage Distribution)
