

LATIN AMERICA AND THE CARIBBEAN

IFC Financing to Micro, Small and Medium Enterprises

Lack of access to financial services is one of the key barriers to the growth of micro, small and medium enterprises (MSMEs), which account for about 90 percent of the businesses and more than 50 percent of employment worldwide.¹ IFC through its network of financial institutions (FI) -- including microfinance institutions, commercial banks, leasing companies -- in more than 100 developing countries, is able to reach many more MSMEs than it could directly.

IFC offers a wide range of financial products and services to its client FIs, including loans, equity, risk sharing facilities, trade finance, working capital loans and advisory services. It also helps to mobilize funding from other FIs and investors. In fiscal year 2017, IFC in LAC provided \$680 million of long-term finance to client FIs for MSME support. As of June 2017 in LAC, IFC's committed long-term MSME-focused portfolio was \$2.1 billion (see Chart 1). In addition, IFC had 21 active MSME-related advisory projects valued at \$9.6 million.

LAC: ANALYSIS OF MSME REACH FROM IFC FINANCIAL INSTITUTION CLIENTS

Every year IFC requests FI clients to provide IFC with information about their loan portfolio, deposits and other business related data. Through this Reach Survey IFC tracks and analyzes financing outreach to the final recipients, including MSMEs.

IFC collected 2016² data from 73 clients in 19 countries in LAC, which had over 164.3 million loans outstanding worth over \$439.2 billion. This included retail, micro, SME and corporate loans. Of these, 63 clients globally received financing for MSME-related activities. Using IFC's proxy SME loan definition,³ it is estimated that these clients had **11.8 million micro and 1.2 million SME loans totaling \$94.8 billion.**⁴ Table 1 and Chart 2 show regional distribution of micro and small loans by volume and number for all regions.

1. Source: IFC Annual Report (2015).

2. Reach Survey data is based on the calendar year cycle, which ends on December 31st, with the exception of a few clients that provide data based on different fiscal calendar.

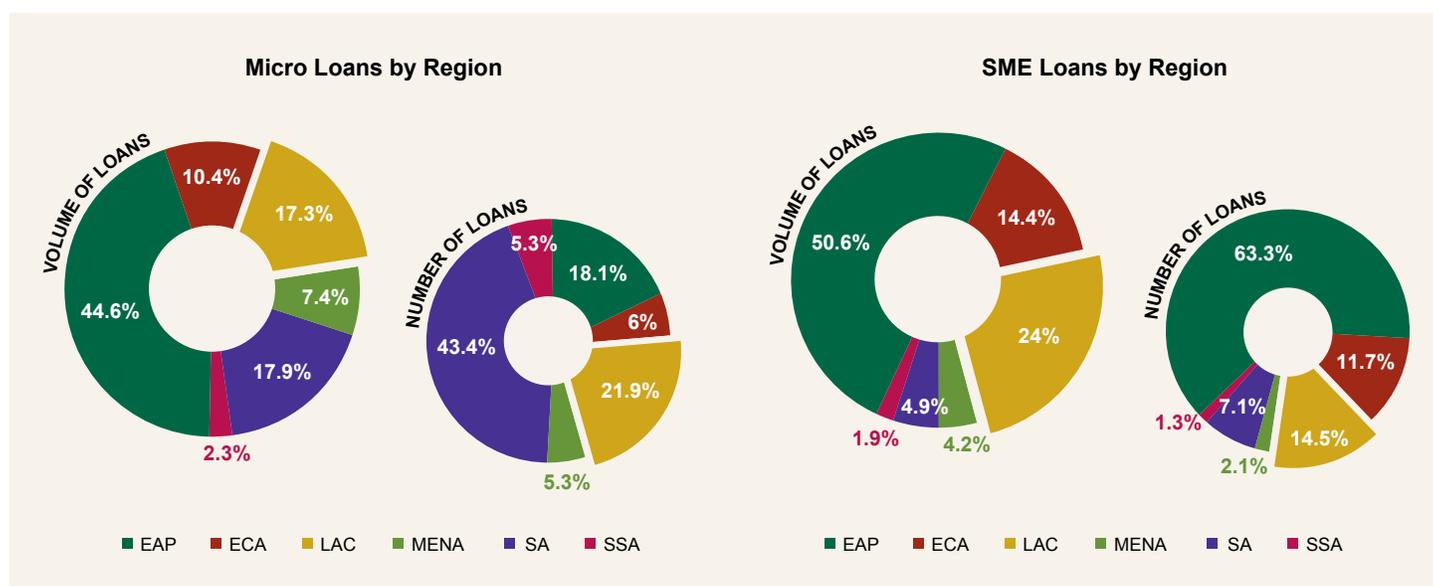

3. IFC categorizes its clients' sub-borrowers according to the following definitions: (1) micro enterprise have loan < \$10,000 at origination; (2) small enterprise have loan \$10,000 - \$100,000 at origination; (3) medium enterprise have loan \$100,000 - \$1 million at origination (\$2 million for more advanced emerging markets).

4. While numerous controls were performed on the data provided by clients, they are sometimes based on estimates and the understanding of the indicator definitions may vary among clients.

Table 1: IFC FI Clients' Micro and SME Outstanding Loan Portfolio by Region, 2016

Region	Micro Loans		SME Loans		MSME Loans	
	# Millions	\$ Billions	# Millions	\$ Billions	# Millions	\$ Billions
East Asia and the Pacific	9.7	27.1	5.3	177.8	15.0	204.8
Europe and Central Asia	3.2	6.3	1.0	50.5	4.2	56.8
Latin America and the Caribbean	11.8	10.5	1.2	84.3	13.0	94.8
Middle East and North Africa	2.8	4.5	0.2	14.8	3.0	19.3
South Asia	23.3	10.9	0.6	17.2	23.9	28.0
Sub-Saharan Africa	2.8	1.4	0.1	6.6	2.9	8.0
Total Loans	53.7	60.7	8.3	351.1	62.0	411.8

Chart 2: IFC FI Clients' Micro and SME Outstanding Loan Portfolio Distribution (%), 2016

LAC: IFC CLIENTS' MSME LOAN PORTFOLIO BY TYPE OF IFC ENGAGEMENT

IFC places its MSME clients in two categories: FIs supported by IFC in the area of microfinance – clients with microfinance-focused engagements; and FIs supported by IFC in the area of SME financing – clients with SME-focused engagements. In 2016, IFC collected or extrapolated data from 17 microfinance and 46 SME-focused engagements in LAC. SME-focused clients funded about 76.5 percent of the total number of micro loans representing 71.5 percent of the total funding for the microenterprises. The microfinance focused clients also crossed over to SME with 10.3 percent of the number of SME loans and 4.2 percent of the total volume. In addition, 29.4 percent of clients with microfinance-focused engagement and 15.2 percent of clients with SME-focused engagement received advisory services.

Table 2: Microfinance-Focused Engagements in LAC⁵

Loan Type	Outstanding Loan Portfolio		Average Loan Size	NPLs
	# Millions	\$ Billions	\$	%
Micro	2.8	3.0	1,080	2.4%
SME	0.1	3.6	28,740	2.1%
Total	2.9	6.6	2,270	2.3%

Table 3: SME-Focused Engagements in LAC⁶

Loan Type	Outstanding Loan Portfolio		Average Loan Size	NPLs
	# Millions	\$ Billions	\$	%
Micro	9.0	7.5	834	5.8%
SME	1.1	80.7	74,458	4.2%
Total	10.1	88.2	8,754	4.3%

Notably, the microfinance-focused engagements reported lower NPL level compared to SME-focused engagement in both Micro loans and SME loans (see Tables 2 and 3).

LAC: IFC CLIENTS' LOANS TO WOMEN AND WOMEN-OWNED MSMES

Gender equality is a fundamental condition for a prosperous and sustainable world; however, in many countries women have lower access to education, employment, business opportunities and financial services, as well as unequal social status and rights. The annual estimated credit gap for women-owned SMEs is about \$260-320 billion.⁷

To address this challenge, IFC launched Banking on Women Program that promotes financing for women-owned SMEs. In addition, recently IFC requested clients to report on their loan portfolios to women-owned enterprises. In 2016, 30 IFC FI clients provided data for micro loans to women while 30 FI clients provided SME loans to women data. These clients provided about 26.4 percent of total micro loans by number to women, and 16.6 percent of total SME loans by number to women-owned firms⁸ (see Table 4).

Table 4: LAC: IFC FI Clients' Loans to Women and Women-owned MSMEs

Loan Type	Number of Loans to Women	Total Volume of Loans to Women	Number of Loans to Women	Total Volume of Loans to Women	NPLs
	# '000	\$ Millions	% Of total	% Of total	%
Micro	2,404.0	1,951.54	26.4%	30.4%	3.3%
SME	93.3	3,045.59	16.6%	8.1%	4.4%

LAC: MSME LOAN PORTFOLIO GROWTH AND DYNAMICS

The volume of micro and SME loans by IFC's portfolio of MSME client FIs has grown consistently over time. Three main factors influence MSME loan portfolio growth: 1) changes in the MSME portfolio among existing IFC clients, 2) entries of new clients, and 3) exits of existing clients, when, for example, IFC clients fully repay their loans. The dynamics of these factors determines the MSME reach growth trends from year to year. Thus, in the post-financial crisis period (2011-2016), the MSME loan portfolio increased 17.3 percent by number, and 14.7 percent by volume of loans on a compounded basis.

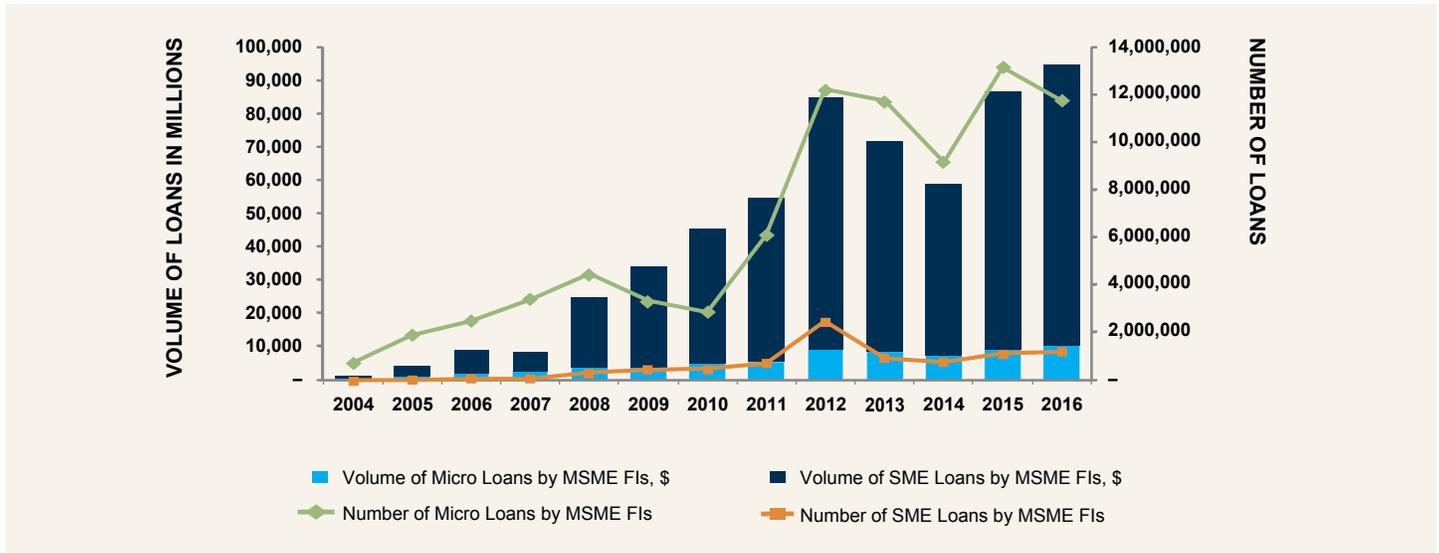

During 2015-2016, the volume of MSME loans increased by 9.3 percent, although the number of loans decreased by 9.2 percent. In 2016, new clients contributed with 389,000 MSME loans totaling \$4.0 billion. Also, 40 MSME-focused clients reported data in 2014, 2015, and 2016. During this period, the number of MSME loans they provided grew by 17.8 percent and volume increased by 12.6 percent on a compounded basis.

5,6. Average Loan Size and NPLs do not include extrapolated data.

7. IFC Enterprise Gap Database (2011). <http://smefinanceforum.org/data-sites/ifc-enterprise-finance-gap>

8. IFC defines women-owned SME as a firm with (a) > 51 percent ownership/stake by a woman/women; or (b) > 20 percent owned by a woman/women AND 1 woman as CEO/COO (President/Vice-President) as well as 30 percent of the board of directors being women where a board exists; and which received loans from \$10,000 to \$1 or 2 million at origination.

Chart 3: LAC: IFC Clients' MSME Loan Portfolio Growth, 2004-2016

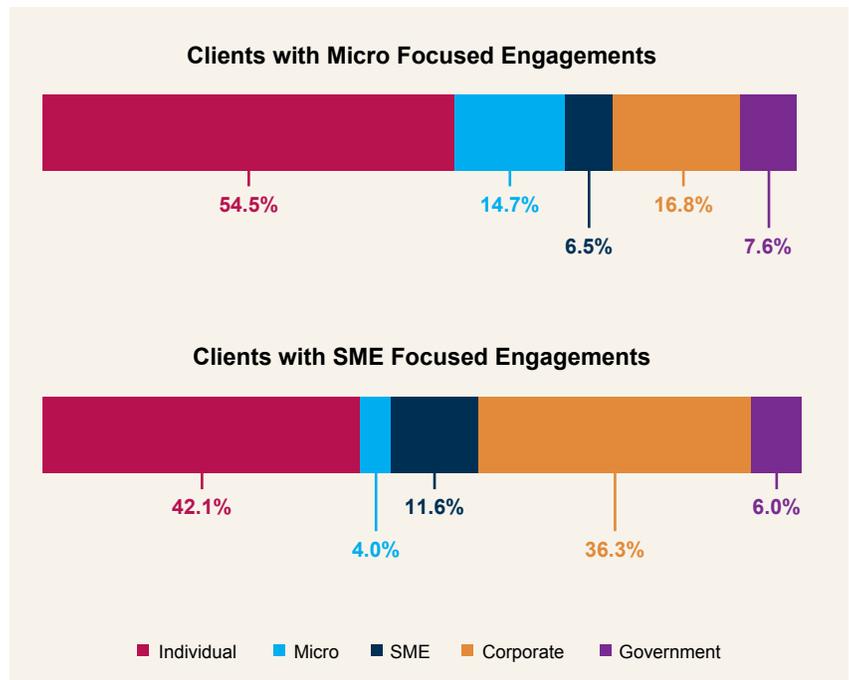

LAC: DEPOSIT AND OTHER TRANSACTIONAL ACCOUNTS

Universal financial access is one of the strategic development goals for the World Bank Group. Financial access may include loans, but can also simply mean someone has access to alternative financial channels (i.e. mobile banking, internet banking) or deposit/saving accounts. The growth of savings accounts is also important because deposits are a major funding source for deposit-taking institutions and a safe place for their clients to store cash.

In 2016, 46 clients reported \$164.8 billion in liability accounts, which include current/transactional accounts, interest-bearing deposits, and e-money accounts. One year before, 38 clients reported \$72.3 billion in deposits and other transactional accounts.

Chart 4 demonstrates the distribution of the deposits and other transactional accounts by the type of the account owner. Individual accounts hold about 42.1 percent of the total deposits volume among SME focused engagements and 54.5 percent among micro engagements.

Chart 4: LAC: IFC Clients' Volume of Deposits and Other Transactional Accounts, 2016 (Average Volume Percentage Distribution)
